

ELECTION DAY ADVISORY

Consumers Energy crews are working efficiently and safely to make repairs and restore electric service for polling locations affected by a powerful windstorm that knocked down trees and damaged electric lines, poles and other equipment across Michigan. We are fully staffed and prioritizing polling locations to ensure the democratic voting process goes smoothly on Tuesday, November 8.

If your polling place is without power and you need to process absentee ballots or conduct early voting, call 800-805-0490 to be connected to a business customer specialist and identify yourself as a polling location.

Trained and dedicated staff will be on standby to help report the issue and ensure electric service is restored as quickly as possible.

Thank you for your cooperation.
